Frightful Facts.

The following statements are appended to a letter from the Commissioner of Internal Revorus to the Secretary of the Treasury:

"The adulteration of syrups with glucese is practice which has recently spread alarmingly. The extensive use of gluose, or the grape-sugar of commerce, is held to be the main origin | case. of Bright's disease of the kidneys and the cause of the present prevalence of that fatal malady. The importations of glucose increased tenfold between 1875 and 1877, and at the same time extensive factories were established for its manufacture in the Western States. The article sold as grape suger is manufactured by boiling corn starch with sulphuric soid, oil of victiol, and mixing the product with lime. A portion of the sulphurio acid, and some times copperss. su'phate of lime and other nexious principles remain in the glucose. In the analveis of seventeen samples of table sgrap by De Kedsie, fi teen were found to be made of glucose, one of them containing 141 grains of oil of vitriol and 724 grains of time to the gal lon, and one from a lot which sickened a whole family contained seventy-two grains of vitriol, twenty-right grains of sulphrate of iron, copperas, and 363 grains of lims to the gulon. The cheap sugars sold in Michigan are stated on the same authority to be adulterated with poisonous substances. Ann yees of the sugar sold in New York roveel the presence not only of glucose with its inberent poisons, but of muriate of tie. a formidable poison, which is employed in the blesching prcoese. Mr. Faller, a retired importer of auger. called the attention of the United States Board of Trade, to their meeting held to Now York to November, 1878, to the dangerous adulter -tious practised with sugar, honey and molases Glucose is largery used to adulterate maple sugar, orndier, j llies, honey and other sweet toods. Oleomargarine, which is now excensively manufac ured f.om animal fat as a substitute for butter, is dreaded as a vih cle for inferring the buman system with trichouse and other internal parasites. The fat is not suljusted to higher temperature than 120 degrees F. John Michels, a chemist, states that the refuse tat of one parkpacking establishment is to his knowledge senote the artificial butter factories.

An editor in Chicago recortly ordered a pair of trowsers from the tailor. On trying them on they proved to be several inches too long. It be- FORRIGN AND AMERICAN WATCHES ing late on Saturday night, the tailer's shop was c'osed, and the editor took the trowsers to bis wie, and asked her to cut them off and hem them. The good lady whose dinner had perhaps d'sagreed with her, brusquely refused. The same result followed an application to the wife's sister and the e dest daughter. But before bed iim the wift relenting took the pants, and cutting off six inch s from the legs hemmed them up n.c :ly and restored them to the closet. Half an hour later the daughter, taken with compunc-tion for her unfilial conduct, took the trowsers and cutting off six inches hemmed and replaced them. It is ally, the sister in-law felt the pange of conscience, and she too performed an additional surgical operation on the garment. Alexandris, Va., August 4, 1881.

I was thrown from my horse 6 or 7 years ago, and suffered a severe wound of the side, which was aggravated by disordered kidneys. Bleven months ago I was attacked with pneumonia and bladder disease, deposite of brick dust and albumen being discernable by the naked eye. I was confined to the house for six months, and was unable to cross the floor without assistance. My physician did me no good. Having read in my religious weeklies of the wonderful cures by your Safe Kidney and Liver Oure, and being advised to use it by Captain Graham, I did so, and am once more able to walk the streets. My pains have left me, and I believe if I had used the remedy a year ago I should then also have been cured.
